

## BUSINESS INTERRUPTION INSURANCE

### BUSINESS INTERRUPTION: ENSURE THE CONTINUITY OF YOUR BUSINESS

Property damage can cause significant interruptions or slowdowns in a company's business, directly affecting its cash flow. To protect the long-term viability of your business, it is essential to anticipate these risks and procure effective protection.

#### OUR SOLUTIONS

Over and above protection against any material damage to your property, no business insurance will be truly comprehensive without business interruption cover. The 'restart' phase after a claimable disaster is often marked by:

- › Additional costs in order to maintain a minimum level of activity;
- › Slowdowns that weaken the company's cash flow;
- › Delays caused by more lengthy replenishment of equipment or raw materials.

**Our goal is to enable you to get through these critical periods without compromising the stability of your business.**

To this end, in addition to your operating assets, we offer a comprehensive approach that includes preventive measures, protection against financial losses, and financing for any additional costs necessary to maintain your business.

**Our packages are tailored to your specific requirements:**

- › **Loss of gross profit margin:** compensation for financial losses related to business interruption or slowdown.
- › **Additional operating costs:** coverage of additional costs incurred in order to maintain a sufficient level of activity.

#### JUTHEAU HUSSON ADVANTAGES

**Our mission: to assist you in protecting your assets, both now and in the long term.**

**Jutheau Husson offers comprehensive support, from the moment the policy is created and throughout the contract, including any follow-up in the event of a claim.**

#### 1. When taking out your policy

- › Targeted analysis of your value chain to identify any vulnerabilities;
- › In-depth research to find the cover best suited to your needs;
- › Comparative analysis of the various solutions available on the market.

#### 2. Throughout your contract

- › Periodic reviews to verify that your contracts remain fit for purpose;
- › Dedicated support when insurers conduct risk assessments;
- › Proactive assistance in implementing preventive measures to reduce industrial risks;
- › Drafting policy summaries and certificates;
- › Advance preparation for renewals.

#### 3. In the event of a claim

- › Validation of cover;
- › Reporting and monitoring of the investigation with the insurer;
- › Negotiation with the insurer so as to obtain swift, optimal compensation.
